

**READING,
LEARNING,
AND
ATTENTION
PROBLEMS**

*do not have to limit
a child's future.*

We've got a way!

Find out what the

Irlen Method,

*using Irlen Colored
Overlays, can do.*

Research was initiated in the 1980's to study methods of helping adults and children with unresolved learning and reading problems. This research revealed that certain individuals showed a marked improvement in their ability when reading material covered by a colored overlay. Helen Irlen developed a diagnostic assessment instrument to accurately determine those individuals who could benefit from reading using color. The Irlen Method provides a real solution that works simply and effectively. It can be easily incorporated into the educational setting and assessment battery.

Registration

Requirements

For the training workshop are: teaching certificate or graduate degree in education, psychology, counseling, assessment, speech, occupational therapy or rehab, or working with literacy in the prison system or a literacy program.

For locations and dates

Of training workshops, check www.IrlenVLCMD.com or call 410-358-7269/Email: IrlenVLCMD@yahoo.com. Workshop dates and locations are updated on a regular basis. Trainings are located at Ruscombe Community Health Center in Baltimore and Amen Clinic of DC in Reston, VA.

To sign up for a workshop

Send or email your resume, including education, work experience, and a brief statement which indicates how you intend to use your training. Send payment and registration materials to IrlenVLCMD, Att: Shoshana Shamberg, 3309 W Strathmore Ave., Baltimore, MD 21215. Cost: \$400 (training)+ \$275 (screener's kit) = \$675. Discounts available.

Thank you for your interest. We look forward to hearing from you.

Join us in one of our two-day seminars specifically designed for teachers, reading or resource specialists, school psychologists, speech-language therapists, occupational therapists, counselors, learning specialists, tutors, and educational therapists.

All workshops are conducted by leading experts in the field who are experienced Irlen Diagnosticians.

In this two-day workshop, you'll learn:

- How to identify individuals with Irlen Syndrome
- The common learning and behavioral characteristics of individuals with Irlen Syndrome
- How perception affects reading, math, copying, and writing skills
- How perception can affect depth perception and sensory integration
- How to test using the Irlen Reading Perceptual Scale (IRPS)
- A variety of intervention strategies including colored overlays
- Hands-on practice using the IRPS

What Others Have Said

“This is, by far, the best workshop I have ever attended. I feel I have learned so much valuable information.”

“The whole training was remarkable! It was valuable to learn a new approach to help those students who have continued to struggle.”

“Thank you so much for sharing this valued knowledge with us. With these insights and techniques, we can help others. I know I will be able to help lots of children.”

“Thank you for all that you taught us. This is one of the best trainings I've ever gone to.”

“I now have another tool to help some students with reading difficulties. Every teacher could benefit from this training.”
